

“Children are human beings to whom respect is due, superior to us by reason of their innocence and of the greater possibilities of their future.”
– MARIA MONTESSORI

APRIL
2021

ON *this* MONTH

AROUND THE COUNTRY

World Autism Day -----	2
Children’s Book Day -----	2
Easter -----	2-5
International Day of Human Space Flight -----	12
Baisakhi Festival -----	13
Nature Play Week -----	14-25
Earth Day -----	22
Anzac Day -----	25
Pay it Forward Day -----	28

Welcome Back to Events.....

Thank you to all our families who were able to join us for our Easter Hat parade. It was a lovely opportunity to welcome families back into the service for celebrations.

Many of our team are engaged in professional development this month.

We have also ordered many new resources which you will see start to arrive over the next month or so.

WORLD AUTISM DAY – APRIL 2

No two people on the spectrum are the same – each person has their own way of seeing the world, which makes them interesting and unique. World Autism Day aims to increase understanding and acceptance of people with autism, foster worldwide

support and inspire a kinder, more inclusive world. **Wear something blue on April 2 in support of understanding and acceptance for people with autism. Find more information for [Go Blue for Autism here.](#)**

PAY IT FORWARD DAY – APRIL 28

Pay It Forward Day is a global initiative that exists to make a difference by creating a huge ripple of kindness felt across the world. We believe that small acts, when multiplied by millions of people can literally change the world for the better. **For some ideas on how you can Pay it Forward follow the link [here.](#)**

EASY PEASY PASTA SALAD

PREP 15 min | COOK 10 min | SERVES 6-8 SERVINGS

INGREDIENTS

- 500 grams short pasta
- 250 grams cherry tomatoes, halved
- 1/2 cup (125ml) store bought basil pesto
- 100 grams parmesan, shaved
- 2 cups (250 grams) baby spinach and rocket leaves
- 1 cup (100 grams) basil, leaves picked

METHOD:

Bring a large pot of salted water to the boil, add pasta and cook according to packet instructions. Drain and rinse under cold water. Place pasta into a large bowl, add cherry tomatoes, pesto, parmesan, baby spinach and rocket, basil and toss to combine. Enjoy x

Book reviews

Celebrate Earth Day with these beautiful picture books.

WHAT'S INSIDE A FLOWER

RACHEL IGNOTOFSKY | 4 - 7

Nurture their curiosity about the natural world—starting with what's inside a flower. Budding backyard scientists can start exploring their world with this stunning introduction to these flowery show-stoppers—from seeds to roots to blooms. Learning how flowers grow gives kids beautiful building blocks of science and inquiry.

THE TREE IN ME

CORINNA LUYKEN | 4 - 8

A stunning and sensitive portrait of the strength within each of us and the nourishment we receive from the natural world. Through poetic text and exquisite illustrations of children revelling in nature, this picture book explores the various ways we as human beings are strong, creative, and connected to others.

MY FRIEND EARTH

PATRICIA MACLACHLAN | 3 - 6

Our friend Earth does so many wonderful things! She tends to animals large and small. She pours down summer rain and autumn leaves. She sprinkles whisper-white snow and protects the tiny seeds waiting for spring. Readers of all ages will pore over the pages of this spectacular book.

FOCUS: One Powerful Word That Will Inspire a Kid Who Says, "I Can't Do It!"

Many parents instinctively know that calling a child "stupid" could influence that child's idea of how smart she is and cause her to behave differently when learning something new. But as it turns out, a child calling herself "stupid" can have the same effect.

The danger of negative self-talk Let's suppose you're back in high school, and you're nervous about a big science test coming up. You tell yourself, "I'll probably fail anyway, so why even study?" By telling yourself that, you've given up before the test even happened and envisioned a future for yourself where you'll skip studying. If you do skip studying, you'll have increased the chances that you'll fail the test. Instead, consider what would happen if you told yourself, "I'm nervous about the science test, but studying will help me feel more confident." You'd be **more** likely to study and therefore more likely to do well on the test. This phenomenon is called a self-fulfilling prophecy. In other words, when you declare something like this to yourself or another person, it's enough to influence your behaviour to fulfill that declaration of "truth."

But the most common response doesn't work When kids engage in negative self-talk, it may sound like: *I'm no good at this, I can't do it, it's too hard, I'll never learn how to read.* Because we love our kids more than anything else in the world, our gut reaction as a parent is to convince them that their words aren't true: You **are** good at this! Yes, you **can** do it! You **will** learn to read. I believe in you!

But have you noticed that when you try to fight your child's negative self-talk with your own positive words, it doesn't work? I learned that lesson the hard way with my 9-year-old. It took me a while to realise that when I unleashed a slew of positive affirmations, it actually made her attitude **worse**. She'd furrow her brow, cross her arms on her chest, and shut herself off from me. I'd unknowingly turned her frustration into a power struggle instead of addressing the heart of the issue.

This is what we're missing. Here's what your child is *really* saying when she talks bad about herself: *I'm frustrated, I feel bad that I made a mistake, I'm scared I won't be able to figure this out.* When we respond with positive affirmations, this is what our kids hear: *Don't be frustrated. Don't feel bad! Don't be scared.*

I don't know about you, but when I'm feeling those emotions and someone responds by telling me **not** to feel those emotions, I don't take it very well. Which means the real problem is that we're not stopping to *empathise* with our kids' big and scary emotions. In that moment when your child gets easily frustrated and her confidence is shaken, she doesn't feel heard. So, what *can* you do in that moment when you hear your sweet child saying mean things about herself, to herself?

Say one simple word. ...yet. Adding this one word builds your child's confidence by giving her a vision of her future where she does "get" it. She'll make choices that will help her **live up** to that new "truth." Which means this little word is important for your child to hear, but it's just as important for you. Because saying "...yet" will stop you from spewing out positive affirmations that will just make your child dig her heels further into the muck of negative self-talk.

For the best results when teaching optimism, grit, and stick-to-it-iveness, you'll want to follow up "yet" with a little more guidance:

1. **Yet** – When you hear your child engage in negative self-talk, close the distance between you, look them in the eye, and repeat their statement but add "...yet" to the end. Depending on the statement, it may work better to say "...not yet."
2. **Empathise** – Let them know you hear their frustration by saying "I can see that you're frustrated." Or "It seems like you're nervous that you won't figure this out." Or "You feel bad that you made a mistake." You might also follow this up with a question to get them talking about what they're stuck on, like "Can you show me the part that's hard for you?"
3. **Turn it around** – Now, ask your child a question to engage their problem-solving skills so they can move forward in a positive way. For example, "How can you try this a different way?" or "What part isn't making sense yet?"

And all you have to remember is **YET**. *Yet, Empathize, Turn it around.*

To read more about 'yet' follow the link below.

Sesame Street has a fun song called 'The power of yet' that illustrates this exact topic.

LET'S MAKE A SHOPPING LIST

We all have to shop for food and making a shopping list is a fantastic literacy activity for pre-schoolers.

Give your child their own notepad and pen and have them make a shopping list. The spelling doesn't have to be correct- the words don't even have to make sense. That's ok.

This is the beginning of writing and understanding the purpose of writing. Have your child bring their list with them, get their own little trolley or basket and shop with you.

HEALTH & SAFETY: Family Meals: Why do they matter?

Getting the whole family to sit down for dinner can be next to impossible – with young children, sport practice, working late and homework taking up the evening hours, many family members eat at whatever time best suits them – and that’s OK from time to time. But research shows that families who eat together regularly (that’s more than three times a week), have shown to have more positive outcomes when it comes to health, family relationships and social development.

The family dinner table, after all, is where children learn manners, converse and interact with grownups, share what’s happening in their lives and experience new foods. The preparation of food and the table setting process are all part of the roles in a family and shape thoughts and feelings around food and family.

Schedule Time to Eat Together

- Eating together can happen at breakfast, lunch or dinner. Choose the meal that gives you the most time to talk and connect.
- If you don’t usually eat together, start by scheduling one meal per week and increase the number as you are able.
- Circle your friends and family around healthy foods as often as you can. The more you eat together, the more you benefit.
- Try to schedule activities so that they don’t interfere with mealtimes. If that’s not possible, create a meal together around a picnic table in a park on the way to piano lessons or soccer.

Tip: Once you decide what meal you are going to eat together, mark it on your calendar like you would any other event. If you have a plan, it is more likely to happen.

Everyone Can Help Plan & Prepare Meals

- Eating together is more likely to happen when everyone helps.
- Involve kids of all ages in planning, shopping for and preparing meals. These are important life skills that can help us eat well.
- Children are more likely to eat the foods they help you to prepare.
- Cooking together is a great way to connect with each other and have fun!

- Use a combination of fresh ingredients and ready-made foods to make fast, easy meals. Over time, make more from scratch. Remember, the meal doesn’t have to be perfect. It’s the time together that’s important.

- Cooking is a great time to teach about kitchen and food safety. Remind children to wash their hands before and after preparing food, to wash vegetables and fruit before eating, and not to mix ready-to-eat foods with foods that need to be cooked. Always supervise their activities. Getting burned or cut puts an end to the fun fast!

Tip: If you aren’t confident in the kitchen, choose simple and familiar recipes. This will help you enjoy your time together instead of trying to figure out the next step in the recipe.

Make Mealtimes about Being Together - Eating together provides a time to be connected. This helps children feel loved, safe and secure. Focus on enjoying each other’s company, not on what or how much each child is eating. Keep mealtime conversations positive and encourage children to talk about their day. This helps to develop more communication between family members.

Tip: Turn off distractions like the TV, computer, tablets and phones during mealtimes. Keep toys and books off the table.

Model Positive Eating Behaviour - You are an important role model for good table manners, trying new foods, and enjoying mealtimes. Children and youth are more likely to eat foods their parents and family also enjoy eating. Make offering new foods part of your regular mealtime routine. Children often need to see, smell, and touch a food many times before trying it, so offer new foods with familiar foods and include foods your child has refused in the past. Not everyone likes every food, and that’s okay. Encourage kids to say “no, thank you,” or teach them what you would like them to do or say if they don’t want to eat something. Trust children to show or tell you how much they want to eat and when they are finished eating. An important part of healthy eating is learning to stop when they are full. Being forced or pressured to finish food can make your child ignore their internal hunger and fullness cues. Try not to rush children through a meal. Children often take longer to eat than adults. Remind children to eat slowly, chew their food well and enjoy what they are eating.

Sustainability CORNER

CELEBRATE EARTH DAY AS A FAMILY

Earth Day was established on April 22, 1970, to educate people about recycling, reducing, reusing, and other ways to protect our planet and keep it clean.

5 THINGS YOU CAN DO AS A FAMILY TO CELEBRATE:

1. Spend a day together in the garden.
2. Plan a meal together that uses fresh, organic, locally grown foods that are in season.
3. Go on a family hike.
4. Switch to reusable water bottles.
5. Have each family member write a pledge about how they will continue saving the Earth all year long, and hang the pledges on the fridge or somewhere else in plain sight.

What's Been Happening at Seaforth Childcare: March

In March, the team at Seaforth Childcare immersed themselves in raising awareness, funds and donations towards two important charities within our community. Share the Dignity and Walk for Autism are two causes that are meaningful and relatable to our line of work as educators to children of all needs and abilities, and to our own experiences as women.

The educators participated in the Walk for Autism on the 21st to the 28th of March, challenging themselves to walk 10,000 steps each day to raise funds and awareness for Autism Spectrum Australia (Aspect).

To help their educators reach their step goal, all the children engaged in a variety of exercises over the week and wore pedometers to keep track of their progress. The children balanced on obstacle courses, engaged in running races, showed off their dance moves and stretched their muscles in yoga. At the end of the week, we had raised over \$800, and with Anita generously offering to match the overall donation, we exceeded our goal with a total of over \$1,600! This money will go towards provide the best opportunities for people of all ages on the autism spectrum so they can participate, engage and thrive in the world around them.

Feature Article

Over the entire month of March, Seaforth Childcare was a proud collection point for the Share the Dignity Drive, helping to end period poverty in Australia.

Share the Dignity is an organisation that aims to restore the dignity to people around Australia who do not have access to period products. This include those that are experiencing domestic violence, homelessness, or are simply 'doing it tough'. This organisation does not discriminate on who receives this products, as everyone deserves to have control of their period. We collected an incredible amount of pads and tampons that will go towards this amazing cause. A huge thank you to all the families that donated to and supported this cause! We will be partnering up with Share the Dignity again later this year in August for their second round of donations.

Adapted by Monkey Baa from the picture book by Jackie French and Bruce Whatley, with foot-tapping music and lyrics by Phil Scott and comedic direction by Jonathan Biggins, Pete the Sheep is a lively and mischievous award-winning musical for young audiences and their adults.

Shaun isn't like the other Shearers in Shaggy Gully... he'd rather be styling than shearing and instead of 'sheep-dog', he has a 'sheep-sheep' named Pete. After being rejected by the shearers and their dogs, Shaun and Pete set up their own Shearing Salon in town and before long word is out and they are inundated with woolly clients and maybe a Ringer or two!

This hilarious show, imaginatively told by four performers playing shearers, dogs and sheep explores the challenges and rewards of being an individual and will be a lasting tribute to honouring your own spirit and strength, whilst working with the flock.

Sand Play

There is no right way to use sand. It invites participation; it permits children to make and test hypotheses; it stretches the imagination; it provides a potentially soothing sensory experience; and it is an excellent avenue for children to learn physical, cognitive, and social skills.

Because sand play is open-ended, the child determines the direction and path of his or her own play. This freedom then clears the way for the child to build developmental concepts.

Sand play promotes physical development. Large muscle skills develop as children dig, pour, sift, scoop, and clean up spills with brush and dustpan. Eye-hand coordination and small muscle control improve as children learn to manipulate sand accessories. Sand play also promotes social skills.

When children work together at the sandpit (or table) they are faced with real problems that require sharing, compromising, and negotiating. A group may engage in dramatic play as they "cook," construct roadways, dig tunnels, or create a zoo for rubber animals. As children take on roles associated with their dramatic play, they learn important social skills such as empathy and perspective taking.

National Quality Framework | Quality Area 3:
Physical Environment Element 3.2 The service environment is inclusive, promotes competence and supports exploration and play-based learning.

Dance time

Short simple activities to get some active minutes in the day.

Dancing makes you feel good, it's fun and a great way to get active. Find some free space somewhere inside or head outside and enjoy the fresh air. Pick a song and turn it up.

You can free dance or take turns with your child making up a dance routine. Add moves together and then put on a show for someone else in the house.
